

Andatech Prodigy^z

Clever and powerful

The Andatech Prodigy S Breathalyser is a state-of-the-art instrument ideal for industry, corporate, medical, personal and anywhere there is a need to screen for the presence of alcohol. Rigorously tested and certified to Australian Standard AS3547, the Prodigy S never fails to get a highly accurate reading of a subject's BAC.

With improved user interface, passive testing, and data upload included at no extra cost, the Prodigy S breathalyser is the best choice for employee testing in the workplace.

- Available Versions:
- Prodigy S (not printer-enabled)
 - Prodigy S Print Pack (printer-enabled, includes wireless bluetooth printer, not sold separately)

Normal and passive mode testing

Use normal mode with a mouthpiece to get accurate 3 decimal place readings or passive mode with a sampling cup to quickly test for the presence of alcohol

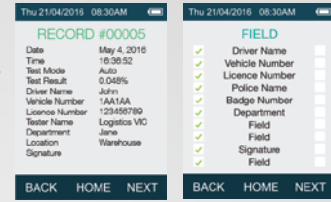

Fast

Lightning fast results, 2 second warm up time and 3 second response time

Clean and hygienic

Mouthpiece eject button for sanitary operation

Specific Data Input and Fields

Optional customisable data collection. Records can be uploaded to a computer or our online server via USB.

Easy-to-use interface

Improved user interface for easy navigation and operation using the touch screen

Accurate and Certified

Certified to Australian Standards AS3547 for accuracy and reliability

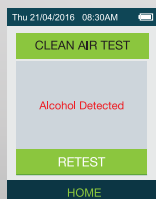

Unlimited tests

Conduct unlimited tests between calibrations (6 months)

Advanced Functions and Settings

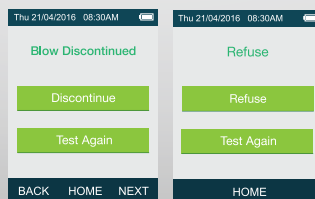

Clean air test

Conducted prior to every test to ensure mouthpiece and sensor are clear of alcohol residue

Re-test prompts

Logs refused or discontinued tests

Calibration statistics

Keep track of the breathalyser's calibration statistics at any time from the settings menu
