

SpillSmart RoadSpill is an organic cellulose absorbent that contains highly effective microbes to 'digest' oils, hydrocarbons and many other liquids that can contaminate roadways, work area's and the environment.

Combined with mineral grit, this high performance product will leave paved surfaces dry and reduce slippage. This is a significant factor improving safety for onsite workers, vehicles and other machinery. It is effective with a wide variety of fluids including, petroleum, oils, fuels, solvents, cooking oils, sewage, protein fluids and other potential pollutants.

It's safe to use on all surfaces and easy to apply. Simply cover the spill with SpillSmart RoadSpill absorbent and agitate with a stiff broom. Use sufficient product until the mix is dry in appearance. Remove the used absorbent and dispose of in accordance with local government regulations.

Designed for:

- The clean up of Road and Industrial spills including - Oils, fuels, solvents, cooking oils, sewerage, protein fluids and other potential pollutants [*Not compatible with strong acid or alkaline solutions.]
- Emergency Service Vehicles
- Transport companies
- Moto Racing circuits
- Mining sites
- Workshops
- Manufacturing industries
- Stevedore companies
- Councils
- Panel shops
- Printing companies

Features:

- Highly absorbent, biologically active, biodegradable & environmentally friendly ingredients
- Added mineral base – leaves surfaces gritty, outperforming standard cellulose absorbents
- Strong 'Wicking effect' – rapidly encapsulates liquids making it far superior to traditional 'kitty litter' products
- Leaves paved surfaces dry reducing slippage
- Safe to use on all surfaces
- Suitable for industrial and domestic use
- Australian Made
