

SpillSmart HazChem Rolls are the most versatile in our range. Being inert they are capable of absorbing most aggressive chemicals and are ideal for responding to spills of unknown liquids.

HazChem rolls are quick to deploy and retrieve and rapidly absorb fluids including Acids and Bases, Oils, Fuels, Solvents, Citric Acid, Sodium Hydroxide and Water Based fluids. Rolls are a convenient alternative to pads, especially in scenarios where greater coverage is required. These Heavy Weight Rolls are perforated to ensure wastage is reduced by selecting exactly the amount required for the job.

Envirosmart has a great range of premium absorbent rolls to take care of a huge variety spills. Please speak to your local distributor for further information.

Designed for:

- Versatility - the most premium absorbent roll in our range
