

MODEL NO: SE850

PRATT 316SS Shower Head with Impeller

Features

- 316SS Shower Head with AES plastic construction Impeller
- Type: Spare part
- Material of Construction: Stainless Steel and AES plastic
- Australian Standard: AS4775

The shower head features an impeller which creates a swirling action of the flushing fluid to ensure whole body coverage. The shower head delivers a large volume flushing fluid spread evenly in a precise pattern and controlled flow rate.
