

SpillSmart General Purpose Organic Socks have been designed to provide a highly absorbent barrier preventing liquids from escaping on hard surfaces or down drains. They can also be placed around machines or drums to contain leaks.

These socks have been manufactured with a tight woven cotton outer layer and contain a biologically active organic fill that assists with bioremediation. They will rapidly absorb hydrocarbon and water based spills including Oil, Fuel, Coolant, Degreasers, Brake Fluid, Paints and other non-hazardous liquids. These socks are a great environmentally friendly alternative, are ideal for industrial clean-ups and provide increased options for disposal.

EnviroSmart has a great range of premium absorbent socks to take care of a huge variety spills. Please speak to your local distributor for further information.
