

SpillSmart Oil Only Pads have been designed to rapidly absorb hydrocarbon based spills. They are suited for both Marine and Land based applications where oil and oil based spills may occur.

Being hydrophobic (repel water) they will float on water and remove and remove oils from the surface. Sometimes referred to as contractor grade, these Light Weight pads are very economical and suit work environments where high usage occurs.

Their polypropylene construction ensures they are strong enough for cleaning machinery yet absorbent enough to hold 20 times their own weight. White in colour, they are easy to identify as an 'Oil Only' pad and are supplied in bales of 200.

### Designed for:

- Marine & land based environments
- Cleaning up hydrocarbons, oil and oil based fluids. (\*These pads will not absorb water or water based liquids)
- Wiping down parts, tools and components
- Automotive industry
- Marina's
- Manufacturing industries
- Warehouse
- Workshops

### Features:

- Fast acting with superior absorbency
- White in colour - easy to identify as an Oil & Fuel only pad and saturation levels are clearly visible
- Economical
- Absorb 20 times their own weight
- Compatible with a large variety of hydrocarbons
- Supplied in bales of 200
- Hydrophobic (resists water) will float and remove oil from the water surface

ES-PP-200 Oil Only Poly Pad - 48cm x 43cm - Light Weight
