

SpillSmart Oil Only Rolls have been designed to rapidly absorb hydrocarbon based spills. They are suited for both Marine and Land based applications where oil and oil based spills may occur.

Being hydrophobic, (repel water) they will float on water and remove oils from the surface. Rolls are a convenient alternative to pads, especially in scenarios where greater coverage is required. Heavy Weight Rolls feature perforations ensuring wastage is reduced by selecting exactly the amount required for the spill.

Our extended sorbent Roll Range offers greater choice with 3 options available – Heavy Weight, Light Weight and a Half Width alternative. Please contact your Envirosmart distributor for further information.

Designed for:

- Marine & land based environments
- Cleaning up hydrocarbons, oil and oil based fluids. (*These rolls will not absorb water or water based chemicals)
- Wiping down parts, tools, components
- Automotive industry
- Marina's
- Manufacturing industries
- Warehouse
- Workshops

Features:

- Fast acting with high absorbency
- Rolls are white – easy to identify as Oil & Fuel Only and saturation levels are clearly visible
- Hydrophobic (resists water) will float and remove oil from the water surface
- Heavy Weight Rolls are perforated to reduce wastage
- Light Weight Rolls can be easily cut to an exact length on site
- All rolls are 44m in length
- 1 roll is capable of covering a large area
- Fast wicking action

ES-PP-R44	Oil Only Poly Roll Dimpled & Perforated - 96cm x 44m - Heavy Weight
ES-PP-RL	Oil Only Poly Roll - 96cm x 44m - Light Weight
ES-PP-RH	Oil Only Poly Half Roll Dimp/Perforated - 48cm x 44m - Heavy Weight
