

SpillSmart Oil Only Socks have been designed to provide a highly absorbent barrier preventing liquids from escaping on hard surfaces or down drains.

Being hydrophobic (resist water) they do have the ability to float on water removing oils from the surface where a boom may not be applicable. They can also be placed around machines or drums to contain leaks. These socks have been manufactured with a poly spun bonded outer layer and a highly absorbent poly particulate fill that rapidly absorbs oils, fuels and hydrocarbons.

Oil Only Socks are colour coded for safety and are easy to mould and shape around leaking equipment or spills.

Designed for:

- Indoor, Outdoor land based applications and spills close to or on water
- Cleaning up hydrocarbons, oil and oil based fluids. (*These socks will not absorb water or water based liquids)
- Creating absorbent barriers around a spill, machinery and drums
- Automotive industry
- Marina's
- Manufacturing industries
- Warehouse
- Workshops

Features:

- Compatible with oil and hydrocarbons
- Manufactured with a poly spun bonded outer layer and a highly absorbent poly particulate fill
- White in colour – easy to identify as an Oil & Fuel Only sock and saturation levels are clearly visible
- Hydrophobic (resists water)
- Fast wicking action
