

SpillSmart SpillPlug is designed for the immediate temporary repair of a leak source, reducing clean-up costs and potential environmental impact. Ensuring correct PPE is always worn, applying a handful SpillSmart SpillPlug will immediately stop a punctured drum leak with no preparation required. With the emergency repair in place, compatible absorbents may now be deployed to clean up the spill and the safe transfer of remaining fluid to a suitable drum or container. SpillSmart SpillPlug is a non-toxic malleable compound that can be formed to plug any shape or size and adheres to wet and dry surfaces. Even when fluid is running! It is compatible with a wide variety of chemicals including solvents, gasoline and diesel making it a 'must have' addition to first response spill kits.

Designed for:

- Punctured Drums
- Leaking Pipes (not under pressure)
- Damaged Valves and taps
- Vehicle accidents
- Damaged fuel tankers
- First response for emergency repair of fuel and hazardous material leaks

** SpillSmart SpillPlug is not suitable on Urethane or Teflon Surfaces*

Features:

- Premixed and ready to use
- Easy to apply and Non-Toxic
- Adheres to wet, greasy, dirty and rusty surfaces
- No surface preparation required
- Australian Made
